-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 7/19/00, 7/27/00, 1/24/01, and 7/4/01. It is noted, however, that applicant has not filed a certified copy of the application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1, 2, 5-10, 16 and 17 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art (pages 1-4).

Applicant's admitted prior art discloses in pages 1-4 a twin drum comprising opposite pairs of rollers, side gates, wherein the cooling drum is formed from a drum body having a shaft portion, and means for preventing various adverse influences due to differences in thermal expansion. In addition, applicant's admitted prior art discloses a drum is formed from, and divided into, a pair of shaft members having a shaft portions provided integrally therewith and being joined to end portions of the drum sleeve, and a core member (11) located between the shaft members and shrink fitted to an inner peripheral surface of the drum sleeve without contacting the shaft member. There are hot water channels, since the cooling water is turned into hot water upon heat exchange.

Allowable Subject Matter

4. Claims 3, 4, 11-15, and 18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior arts of record fail to teach shrink fit between the drum sleeve and the core member supporting the drum sleeve from inside, a tightening margin at an intermediate portion in a drum axis direction is greater than a tightening margin at the end portion.
